

CapitalAscend Vault Tool: Mock Traction Dashboard Builder

Simulate investor-ready forecasts - even before you've launched.

What It Does:

- * Simulates 6-month traction forecasts
- * Models retention and compounding revenue
- * Generates pitch deck-ready text summaries
- * Helps you present yourself like a fundable founder
- * No data required - just strategy, vision, and AI

How to Use It:

1. Enter your market size, conversion %, price, and retention.
2. Get a 6-month user/revenue forecast table.
3. Use it in your deck, pitch, or applications.
4. Edit to fit your brand - or plug into Canva.

Bonus:

- * Editable Canva forecast template
 - * Before/After founder pitch summary
 - * PDF: 5 Ways to Use Forecasts to Close Your First Check
- > Available at ai.ZingThis.com - CapitalAscend Pro access required.
